Our Small Business Website Offerings

Creative Web Actions' *Small Business Website* is an innovative offering for small businesses. It's a complete website that's fully operational and thoroughly tested.

Our Small Business Website Offering is integrated with many practical features and tools to manage and change your business content.

Creative Web Actions has designed this offering specifically for the small business owners, like you that want a professional looking website at a reasonable price.

Our offering allows you to take charge of your websites and either have you perform content changes or have us do it for small fee or some else.

But, site owners can do a lot more than just do simple content changes. This offering implements a unique set of easy to use functions to customize different sections of the site, arrange and organize content, develop new pages and create posts very easily.

The capabilities are so powerful that you can change content and pictures and create new menu items on your existing website without special programming skills.

You as the owner and expert of your business, have complete control over content and the messages you want to publish to your business audience.

A Better Cost-Effective Solution

Our *Small Business Website* Offering reduces the cost of ownership by drastically reducing the need for high paid technical talent to make changes. The focus is to spend more effort on developing the right content to achieve your sales goals.

Creative Web Actions approach gives you the option to write content yourself or staff or to solicit copywriting services or have us do the task for a small fee. The website programming aspect is essentially removed from the work efforts. The focus is on business objectives and content to achieve your business goals.

Small Business Website

Creative Web Actions' *Small Business Website* Offering is priced as a single one-time price offering with first year of quality annual hosting and managed service to keep your website running. This offering uses specialized services to implement 4 distinct web service features.
